

INTRODUCING THE GEOBUBBLE

The GeoBubble technology and 'Guard' materials have been developed over the past 5 years.

Research has gone into the use of the best additives, stabilisers, anti oxidant package and bubble design, with the aim to provide the best performing and longest lasting swimming pool bubble cover material available.

The new EnergyGuard, Sol+Guard and CoolGuard materials with GeoBubble technology have a 4 year pro rata warranty and 2 year warranty on Std material.

THE NEW GEOBUBBLE COVER MATERIALS:

- Have a scientifically designed bubble shape that is stronger and will last longer against chemical and Ultra Violet (UV) attack
- Will save you money & time and reduce the carbon footprint of your pool
- Are available in a variety of standard colours and 'Guard' materials with their added benefits

NOT ALL BUBBLE SWIMMING POOL COVERS ARE THE SAME

GeoBubble Technology...

.... scientifically designed to be more resistant to chemical and UV attack for longer than a traditional shape bubble, and as a result its expected lifespan will increase by 25%+.*

Eliminating weak and thin points gives you a stronger pool cover that can withstand chemical and Ultra Violet (UV) attack which leads to premature failure.

WHY USE A STANDARD SWIMMING POOL COVER?

GUARD MATERIALS INCREASE PERFORMANCE

GeoBubble technology combined with high performance Guard materials will give you a longer lasting* cover with the highest energy and chemical saving efficiencies. As well as the standard water, energy, and chemical savings, each Guard material has been developed to have their own unique benefits:

The best solar heating bubble cover available; increasing pool temperatures by up to 8°C through solar energy gain plus extending your pool season by up to 2 months.

The ultimate cover at inhibiting algae growth reducing your daily running costs; chemical usage by up to 70% and pump and filtration time by up to 50%.

The optimum cover for reducing water temperatures by up to 15%, keeping the water cool and refreshing by reflecting the sun's heat away from the pool.

POSTAL ADDRESS:

PO Box 25247, East Rand
1462, JHB, South Africa

PHYSICAL ADDRESS:

32 NorthRand Rd, Cnr
Romeo Str, Hughes Ext,
Boksburg, JHB.
